

HARISON®

Preservation Specialized Dehumidifier

Harison floor standing specialized packaged series consists of three models with airflow rate of 900CMH, 2500CMH, 4500CMH. These units are specially designed and manufactured to efficiently dehumidify and kill air-borne microbes, fungi and mildew pores, dust-mites...to inhibit mold growth and maintain proper moisture content in hot storage condition. They are perfectly suitable for storage of paper, wood, handicraft material, leather, cloth, dried food & fruit, ..in hot and humid tropical environment.

KEY BENEFITS

Hydrophilic Evaporator
40% more efficient
Faster dehumidification

High-efficiency compressor
complete with internal cut-outs
and high/low pressure protection

External Humidity Controller
Automatic operation
Energy saving

UV Sterilization Lamp
Inhibit Mold/fungi grow
Killing dust mites/microorganism

FILTER

Washable nylon filter
Re-usable
Economical

RIGID METAL CASING

Durability

R404C refrigerant
Environmentally friendly
Long term saving

Extended air duct
Stronger Air circulation

WORKING PRINCIPLE

Centrifugal fan draws humid air through evaporator (cooling coils) where it is cooled down below its dewpoint, water vapor is thus condensed into water and drained away. condenser (hot coils) where it is reheated. Warm and dry air is finally blown back to controlled space to continue dehumidification operation.

Note: dry air is going under UV-C light field where more than 90% of mold/fungi pores, dust-mites, microorganism...are killed. Room is continuously sterilized.

To ensure smooth operation and long service life, dehumidifier is equipped with additional basic components: Filter installed in front of evaporator to clean air and protect evaporator coil from clogging; Defrost circuit to defrost coil under low temperature condition; Humidistat to control dehumidifier automatically.

Dehumidification Capacity Chart

About Harison Dehumidifier

Harison industrial dehumidifiers are products of Naav Solutions Inc with head office located in the beautiful city of Vancouver, BC, Canada. The products are designed and built to dehumidify efficiently in various working environments and well-known for their high quality and durability.

Why dehumidification?

High relative humidity is the main causes of many common problems: Corrosion, Product deterioration, Condensation, Damp, Mould and mildew, Moisture regain, Prolonged drying, Manufacturing delays, discomfort. Harison dehumidifier are used to control relative humidity to eliminate these problems.

How to select correct size dehumidifier

Firstly, the moisture load (latent load) of the project must be estimated. Secondly, designer can use dehumidification capacity chart provided on the right hand size to select suitable model according to room RH% and temperature.

Alternatively, we also offer free computer-aided selection service directly or through our officially trained representative in your area. Please contact your local distributor for assistance.

Installation guide

SPECIFICATION

		HD-150PS	HD-192PS	HD-504PS
Operating temperature range	°C	5 ~ 42		
Dehumidification Capacity @ 30°C,70%	kg/h	6.25	8	21
Airflow rate	CMH	900	2500	4500
External static pressure	Pa	50	110	110
Noise	dBA	57	59	70
Refrigerant		407C		
Refrigerant charge	kg	1.45	1.9	3.2
Max suction pressure	MPa	1.0	1.0	1.0
Max discharge pressure	Mpa	2.5	2.5	2.5
Power source	V/Ph/Hz	220V/1Ph/50Hz	380V/3Ph/50Hz	
Nominal power consumption	kW	1.76	4.53	9.35
Rated current	Amp	9.2	8.4	16.9
Dimensions				
Width	mm	597	776	1225
Depth	mm	355	471	520
Height	mm	973	2149	2281
Weight	kg	63	160	252
